S U M A R Y

Hi, I'm Sourabh, a front-end developer and student passionate about crafting seamless, interactive experiences. I specialize in React.js, HTML, and CSS, blending creativity with functionality to bring designs to life. I enjoy working on dynamic user interfaces, solving complex problems, and continuously learning new technologies to enhance user interactions. From structured layouts to engaging animations, I strive to create front-end experiences that are both visually stunning and technically sound. My goal is to gain hands-on experience through an internship, refining my skills and contributing to meaningful projects that push the boundaries of web development.

E X P E R I E N C E

Front-End Developer (Project-Based)
Personal Portfolio Development
Jan 2025 – Present

- Crafted and developed a responsive portfolio website utilizing React, JavaScript, and modular CSS.
- Integrated animated Hero sections, interactive contact forms, and semantic HTML to enhance accessibility.
- Emphasized dynamic UI/UX by incorporating CSS transitions and adhering to responsive design principles.
Consistently updated the site to represent evolving skills and highlight development projects.
